NILS AM SEE

The Boutique Hotel in Weiden am See

Discover how NILS am See, a sophisticated boutique hotel on the shores of Lake Neusiedl, has seamlessly integrated digital parking management to enhance guest experiences and streamline operations. With 66 elegant rooms accommodating up to 120 guests, NILS am See offers a haven of tranquillity, nature, and modern design. The hotel provides a tailored holiday experience for families, solo travellers, couples, and business travellers alike.

To stay ahead of the curve, the hotel embarked on a journey to align guest reservations with parking logistics, creating a blueprint for enhanced automation and optimised use of parking space. This initiative not only simplifies the entry process for guests but also offers a comprehensive overview of parking availability.

Alexander Youssef, Managing Director of NILS am See, explains that the vision for the hotel includes the implementation of advanced digital solutions. As part of this vision, they decided to build a state-of-the-art parking facility to meet their guests' needs.

The discovery of Toogethr's advanced parking solution came through a trusted recommendation from a partner. Youssef highlights the benefits of the solution: "Through the Toogethr system, guests can effortlessly reserve parking spaces in advance, complete with optional charging points. This strategic approach allows for a better overview of occupancy, both in real-time and for future planning, enabling more accurate scheduling. It simplifies daily operations for our staff while allowing our guests to enjoy maximum comfort and convenience. This is particularly valuable during late check-ins, check-outs, and times when the reception may be unstaffed. Parking reservations and number plate recognition facilitate seamless check-ins and check-outs."

Youssef advises businesses to collaborate with experienced professionals like Toogethr to ensure smooth technical installation and operation.

NILS am See has always been dedicated to offering their guests the best experience while remaining at the forefront of technology. Their decision to implement digital parking management is a prime example of this forward-thinking approach. Alexander Youssef's support underscores the importance of forming strategic partnerships with industry experts like Toogethr and the immense potential such collaborations bring.

With the Toogethr platform, guests can effortlessly reserve parking spaces in advance, complete with optional charging points.
